Plant capacity

100,000 grams Au

annual production estimated

CURRENT STATUS OF THE PROJECT

Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

Currently the mining title is in the contractual stage of construction and assembly, advancing geological studies for the estimation of mineral resources and reserves.

Adherence to initiatives and best practices:

No use of mercury or cyanide in the mining title.

The mining title is linked to the Veta program of the National Mining Agency.

Environmental License (CDA)

- Requested
- Under consideration
- Approved

Resolution 446 of December 30, 2019 by the Corporation for the Sustainable Development of the North and Eastern Amazon – CDA.

Main achievements in social management

Prior consultation was carried out with the indigenous communities in the area of influence of the project, the minutes of protocolization were signed with MININTERIOR - CONSULTA PREVIA and the communities, in turn, the communities in the area of influence are in agreement with the development of the project.

Works and construction program - PTO (National Mining Agency)

- Submitted
- Under evaluation
- Approved

Auto SFOM 1287 of October 26, 2009.

Additional project data : PTO and Mineral Resources and Reserves are being updated in accordance with the Colombian Resource and Reserve Standard. The mining community of the municipality of Taraira and the indigenous communities in the area of influence of the project are in agreement with the exploitation of minerals.
