CURRENT STATUS OF THE PROJECT

Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

The project is in exploration stage.

Adherence to initiatives and best practices:

Environmental License (CAR)

- Requested
- Under consideration
- Approved

Main achievements in social management

Socialization of the initial surface exploration campaign to identify support staff.

A social worker is working with the community to identify and structure the programs to be developed.

Works and construction program - PTO (National Mining Agency)

- Submitted
- Under examination
- Approved

Whit file N°20201000751752 of September 24, 2020, the final exploration report was submitted, the works and construction program is currently being elaborated.

Additional project data: Surface and underground exploration campaign was brought forward through a network of 45 exploratory wells with intervals of 0.5 to 1 km and depths between 50 and 790 m, with their corresponding drilling logs. From the interpretation, the following coal mantles have been identified: M4A, M4B, M4C, M4D (Cerrito Formation), M5A, M5B, M5C, M5D, and M5E (Cienaga de Oro Formation).
