CURRENT STATUS OF THE PROJECT

Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

The necessary adaptations have been made for the operation of the project, access roads, assemblies (camp, electrical networks, sanitary, dump and others), starting with the opening of the main tunnel, which has an advance of 200 meters towards the identified productive and/or mineralization zones.

Adherence to initiatives and best practices:

It is one of the projects linked to the VETA initiative of the National Mining Agency, to facilitate and encourage the development of small and medium-sized mining that is technified, productive and with high safety standards, promoting better technical and labor conditions and more efficient production practices with high social and environmental responsibility.

Environmental License (CORPOBOYACA)

- Requested
- Under examination
- Approved

Approved license by the Corporacion Autonoma Regional de Boyaca – CORPOBOYACA through Resolution 0155 of January 22, 2016.

Main achievements in social management

Excellent relationship with the population close to the project (3 families), who have become involved in the project.

A socialization campaign has been carried out in the area of influence.

Support for families located in the project's area of influence in traditional agricultural and livestock activities on the land acquired by the mining company.

Support for cultural and social activities in coordination with municipal authorities.

Works and construction program - PTO (National Mining Agency)

- Submitted
- Under examination
- Approved

In the 239 Concessioned Hectares, 3 Tunnel entrances have been approved, with the possibility of increasing their number.

Additional project data: The project is located within the priority areas proposed by the National Government as National Reserve Zone for Esmeraldas, Coscuez - Boyaca (Min Minas - Ingeominas May 2004). The project has only one owner, own investment resources and licensing required to continue with the mining activity immediately, without social conflicts in the area of interest.
