MAIN INFORMATION

US\$ 45 million

Global investment

US\$ 1 million

Executed investment

2011

Start of construction

2012

Start of operations

10 direct jobs

Employment

Type of project

- New (greenfield)
- Enlargement (brownfield)
- Replacement (brownfield)
- Reutilization (greenfield)

Emeralds associated with calcite, dolomite, pyrite and albite veins

Type of deposit

In evaluation

Mineral reserves (ECCR standard)

In evaluation

Mineral resources (ECRR standard)

Underground

Type of mine

50 years

Mine life cycle

From 20,000 to 150,000 Carats

Estimated annual production

CURRENT STATUS OF THE PROJECT

Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

The project is in the exploitation stage. Exploration and determination of the size and characteristics of the structure began in 2011. Emerald samples were found in April 2017 and May 2021.

Adherence to initiatives and best practices:

Environmental License (CORPOBOYACA)

- Requested
- Under examination
- Approved

Resolution number 3332 of November 30, 2010. Corpoboyaca granted environmental license for the exploitation of the emerald deposit.

Main achievements in social management

The people hired to carry out the mining work are part of the population residing in the project's area of influence.

Works and construction program - PTO (National Mining Agency)

- Submitted
- Under examination
- Approved

Additional project data : *the project has studies elaborated by professional experts with more than 30 years of trajectory and experience in the emerald mining sector. They are part of the company's board of directors.*
