Underground  
*Type of mine*

15 years  
*Mine life cycle*

50 tpd  
*Plant capacity*

1,267.39 oz  
*Production 2020*

## CURRENT STATUS OF THE PROJECT

### Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

The project is currently in production.

### Adherence to initiatives and best practices:

### Environmental License (CORANTIOQUIA)

- Requested
- Under consideration
- Approved

CORANTIOQUIA resolution number 130th7797 of July 2010, modified by resolution number 1601-12443 of January 2016.

### Main achievements in social management

Morocota Gold has been working hand in hand with the environmental board of the municipality of Gómez Plata, actively participating in different programs and collaborating in activities such as sustainable homes, the "piragüeros" program, beekeeping activities and clean-up days in the villages, among others. The Company has also participated with Corantioquia (environmental authority) and the Mayor's Office in tree planting and reforestation programs. It is also important to highlight the Company's commitment to the environment, as it has provided training on mercury elimination to miners in the area, both those who are part of the company and those who work independently. Likewise, the community itself has recognized the company for hiring female labor to work in the different areas of the company. Likewise, the company is committed to the children and youth of the municipality, carrying out activities that enrich the progress of this population, such as visits to the zoo, self-care workshops and donation of school supplies.

### Works and construction program - PTO (Secretary of Mines of the Government of Antioquia)

- Submitted
- Under evaluation
- Approved

Approved by Resolution number 05820 of 2008.

**Additional project data: MOROCOTA GOLD S.A.S.,** seeks in the short term to start with the production of concentrates in the plant, in order to reduce the consumption of energy and chemical products, beyond this process, it implies an important collaboration with the environment.
