Adherence to initiatives and best practices:

LCL's sustainability model is based on the ESG framework, which is structured in 6 pillars that encompass the company's most relevant environmental, social and governance interactions.

The alignment of the sustainability strategy with the Sustainable Development Goals (SDGs) and with the implementation of other international standards or initiatives such as TSM and Human Rights Due Diligence is highlighted.

# Main achievements in social management

LCL is committed to the principles and practices of sustainable development and believes that an active and committed approach to sustainability is essential to fulfilling its responsibilities to its shareholders, employees, our communities, and the environment.

Liaison and open communication are essential. The company strives to apply best practices in health and safety management, the local economy, and community entrepreneurship initiatives.

Proof of this are the actions that the company has carried out, such as the "Miraflores Somos Todos" program, the promotion of productive projects, the sponsorship of higher education scholarships, the support of community infrastructure, the creation of the Miracoop Cooperative, all of them in line with continuously strengthening our social licenses.

Additional Project Data: The Quinchía Gold Project covers 10,542 ha, including the Miraflores, Dosquebradas and Tesorito deposits; It has more than 40,000 m of drilling. For the 2023 term, the company has an environmental license and an approved and Works Plan for title 010-87M (Miraflores Project).
