Type of mine

14 years

Mine life cycle

-

Plant capacity

36,432 gr/year Au

Estimated annual production

CURRENT STATUS OF THE PROJECT

Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

In contractual stage of exploitation. A PUEE was submitted in 2020 to redefine the project focused on porphyry copper and gold.

Adherence to initiatives and best practices:

Environmental License (Cornare)

- Requested
- Under consideration
- Approved

Approved by Resolution 112-2315 of June 20, 2012 by the Corporación Autónoma Regional del Centro de Antioquia CORNARE.

Main achievements in social management

Acceptance of the mining project in the territory, which is developed in coexistence with ecotourism projects such as Termales del Espíritu Santo, which is located within the area of title H7055005.

Works and construction program - PTD (Secretary of Mines of the Government of Antioquia)

- Submitted
- Under evaluation
- Approved

Approved by Resolution 0108701 of August 16, 2011.

The PUEE was submitted with file No. 2022010277136 of July 01, 2022.

Additional project data: *The project includes a title of 2,500 hectares and 15,000 hectares in applications, for which the Single Program for Exploration and Exploitation was filed and is currently being evaluated by the Mining Authority.*

The project includes geophysics and drilling, as well as rock, soil and sediment sampling.

Within the mining title there is the progress of two main guides as part of a preparation and development process, whose entrances are called Corozal and Cuero Duro.
