Estimated annual production

CURRENT STATUS OF THE PROJECT

Stage progress:

- Pre-feasibility
- Feasibility
- Detail engineering
- Construction

The project is in the first year of exploration stage.

Adherence to initiatives and best practices:

In compliance with Law 1658 of 2013 for the elimination of the use of mercury in mining practices, and in compliance with the Organization for Economic Cooperation and Development (OECD).

Environmental License (CAR)

- Requested
- Under consideration
- Approved

The environmental license is currently under development to be requested.

Main achievements in social management

The community inclusion in the development of the mining project has been one of the greatest achievements, their support has allowed the development of the project in an efficient and articulated manner.

The project includes the development of female miners and the formalization in the region.

Works and construction program - PTO (National Mining Agency)

- Submitted
- Under examination
- Approved

The mining title is in the first year of exploration stage, all necessary studies will be brought forward to determine the feasibility of the mining project and to structure the PTO.

Additional project data : *The project corresponds to medium mining with an area of 4,171.8549 hectares.*
